Sydney Sterling

DATA ANALYST

Bengaluru, India • +91 XXXXX XXXXX • sydney.email@example.com

LinkedIn: linkedin.com/in/sydneysterling • GitHub/Portfolio: github.com/sydneysterling

PROFESSIONAL SUMMARY

Entry-level data analyst candidate interested in turning raw data into clear insights and useful reports. Focused on data cleaning, exploratory analysis, spreadsheet workflows, and communicating findings through visual dashboards.

TECHNICAL SKILLS

Core Skills	Python, SQL, Excel, Pandas, Power BI

PROJECTS

Sales Data Analysis Dashboard | Personal Project

- Clean and analyse a sample sales dataset using Python and Pandas; use SQL queries to answer business questions.
- Build a Power BI dashboard with sales trends, product performance, and regional comparisons; add only verified findings.

Excel KPI Tracker | Personal Project

- Create an Excel workbook using formulas, PivotTables, and charts to track key performance indicators.
- Document data sources, assumptions, and steps so the analysis can be reproduced.

EDUCATION

BCA / Relevant Degree — Institution Name | Expected Graduation: Year

Relevant coursework: Programming, Data Structures, Databases, and related subjects (edit to match your actual coursework).

CERTIFICATIONS & DEVELOPMENT

Add certifications, workshops, or courses you have genuinely completed. If none yet, replace this section with relevant coursework or learning goals.

Template note: Replace contact and education placeholders, verify each skill, and describe only projects you actually build. Project examples are ideas, not claims of completed work.
