Sydney Sterling

MACHINE LEARNING ENGINEER

Bengaluru, India • +91 XXXXX XXXXX • sydney.email@example.com

LinkedIn: linkedin.com/in/sydneysterling • GitHub/Portfolio: github.com/sydneysterling

PROFESSIONAL SUMMARY

Entry-level machine learning candidate interested in building, evaluating, and packaging data-driven models. Focused on Python workflows, data preparation, model validation, and reproducible development practices.

TECHNICAL SKILLS

Core Skills	Python, Pandas, Machine Learning, Scikit-learn, Docker

PROJECTS

Predictive Classification Model | Personal Project

- Prepare a public or sample dataset with Pandas and build a Scikit-learn classification pipeline.
- Evaluate with suitable metrics and a held-out test set; record limitations and avoid claiming performance before testing.

Containerised ML Prediction API | Personal Project

- Package a trained model and a small prediction interface in a Docker container.
- Write clear setup instructions and test the container locally before describing it as complete.

EDUCATION

BCA / Relevant Degree — Institution Name | Expected Graduation: Year

Relevant coursework: Programming, Data Structures, Databases, and related subjects (edit to match your actual coursework).

CERTIFICATIONS & DEVELOPMENT

Add certifications, workshops, or courses you have genuinely completed. If none yet, replace this section with relevant coursework or learning goals.

Template note: Replace contact and education placeholders, verify each skill, and describe only projects you actually build. Project examples are ideas, not claims of completed work.
