PROFESSIONAL SUMMARY

Entry-level web developer candidate interested in building responsive, accessible, and user-friendly web experiences. Focused on semantic HTML, maintainable CSS, interactive JavaScript, React components, and collaborative version control.

TECHNICAL SKILLS

Core Skills	HTML, CSS, JavaScript, React, Git

PROJECTS

Responsive Portfolio Website | Personal Project

- Build a multi-section portfolio using HTML, CSS, and JavaScript with responsive layouts and accessible navigation.
- Use Git for version control and publish the finished project with clear setup instructions.

React Task Tracker | Personal Project

- Create a React interface to add, complete, and filter tasks using reusable components and state.
- Test common interactions, handle empty states, and document how to run the app.

EDUCATION

BCA / Relevant Degree — Institution Name | Expected Graduation: Year

Relevant coursework: Programming, Data Structures, Databases, and related subjects (edit to match your actual coursework).

CERTIFICATIONS & DEVELOPMENT

Add certifications, workshops, or courses you have genuinely completed. If none yet, replace this section with relevant coursework or learning goals.

Template note: Replace contact and education placeholders, verify each skill, and describe only projects you actually build. Project examples are ideas, not claims of completed work.
